## Supports Wi-Fi & BT

M274F is a smart module based on MediaTek Octa-core 2\*ARM Cortex-A78 and 4\*ARM Cortex-A55 processor launched by Sunning Smart Devices Co., Ltd, which is equipped with Android 13 operation system. It has powerful performance, neon engine processing, 2D/3D graphics acceleration processing capability, and fully meets customer’s demands for high speed and multimedia functions in industrial and consumer applications.

M274F supports full coverage of all network systems, Wi-Fi 802.11a/b/g/n/ac/ax, and BT5.2 near-field wireless communication. In addition, M274F also has audio and video input and output interfaces and rich GPIO interfaces. It also supports a variety of audio and video codecs.

M274F is a patch module with a total of 285 pins, including 208 LCC pins and 77 LGA pins. The size is only 55.0mm × 55.0mm × 3.7mm, which can be embedded in various M2M product applications through pads, making it widely used in smart cash registers, smart POS, tax control machines, security monitoring, vehicle equipment, and high-end information collection equipment, smart robots, smart homes, smart hardware, industrial smart handheld devices, drones, high-end police or law enforcement equipment, smart intercom devices, smart wearables, vending machines, logistics cabinets and other equipment are used in different industries.

### Main Advantages

- ✓ Support Wi-Fi 802.11a/b/g/n/ac/ax and BT5.2 LE short-range wireless communication;
- ✓ Support ethernet communication;
- ✓ Support multiple audio and video codecs;
- ✓ Possess audio and video input and output interfaces and rich GPIO interfaces
